Subject: FW: Challenge Your Mind at the National Security Agency
Date: Wednesday, August 29, 2012 9:00:25 AM

The National Security Agency (NSA) has many exciting career opportunities available for intelligent young professionals such as yourself. Our career fields offer you the unique opportunity to work on some of the most challenging projects you have ever seen.

At NSA, you can have a global impact in providing the fullest and most accurate foreign signals information to our Nation's leaders, or help protect U.S. information systems from foreign adversaries.

In addition to using your intelligence to help keep the Nation safe, you'll enjoy an incredible benefits package, flexible work hours, and competitive pay.

If you want a truly exciting career working on challenging projects, join NSA.

We're looking for intelligent individuals in the following fields:
- Computer/Electrical Engineering
- Computer Science
- Mathematics
- Foreign Language
- Intelligence Analysis
- Information Assurance
- Cryptanalysis
- Signals Analysis
- Business Management
- Finance & Accounting

And if you are looking to expand your intelligence, NSA offers a wide variety of training and development programs for growth and advancement. We also offer numerous student programs, internships, scholarships, and co-ops.

Learn more about available career opportunities and application instructions by visiting http://www.aftercollege.com/company/national-security-agency/

U.S. citizenship is required. NSA is an Equal Opportunity Employer.
