

Learning objectives

Chapter 14: Personality Theory & assessment

1. Define personality.
2. Compare and contrast the major perspectives of personality and its development including:
 - Psychodynamic (Freudian and Neo-Freudian)
 - Humanistic
 - Cognitive-behavioral
 - Biological
3. Explain what each of these perspectives assumes about personality and its development.
4. Recall or recognize important names associated with each perspective and describe his/her theory.
5. Explain what the major theorists assume about personality and its development.
6. Compare and contrast objective versus projective testing techniques used to measure personality.
