Environmental Programs Manager

Job Reference #	JP31040
Location	204-Chino Sub ,Chino CA
Type	Full Time

Description
<p>Job Category: Engineering/Technical, Professional, Skilled/Craft</p> <p>Basic Qualifications: Bachelors Degree in Environmental Sciences, Physical or Natural Sciences, or related technical field; or an equivalent combination of education, experience and training.</p> <p>Job Requirements: Typically possesses eight or more years experience with environmental responsibilities, such as hazardous waste management, storm water plans/permitting (NPDES), Spill Prevention Control and Countermeasure Plans (SPCC), and Hazardous Materials Business Emergency Plan development and implementation. Thorough knowledge of federal, state, and local environmental health and safety regulations. Demonstrated experience leading teams on the successful implementation of environmental programs and processes. Demonstrated experience balancing and organizing multiple large-scale, cross functional projects, reviewing and documenting project progress, developing communication plans, and reviewing and updating scope and progress. Recognized internally and externally as an expert in the field. Must have strong oral and written communication skills, and be customer focused to understand and appropriately respond to clients business needs. Demonstrated ability to validate and accurately analyze information, and make sound decisions that have considerable business impact. Demonstrated the ability to interface effectively and collaborate with clients, peers, vendors and all levels of management to successfully meet shifting needs. Demonstrated ability to motivate self and others to overcome obstacles and achieve goals. Must be proficient in Microsoft Excel, Word, and PowerPoint.</p> <p>Preferences: The preferred candidate will possess an advanced degree in a related field; applicable environmental certifications; demonstrated knowledge of SCE and Transmission and Distribution Operations; and a thorough knowledge of SCE's safety philosophy, goals and objectives.</p> <p>Typical Responsibilities: As a member of the Environmental Health & Safety (EH&S) compliance group within Transmission and Distribution Safety and Environmental Programs & Services, the successful candidate will be responsible for providing technical/professional guidance and leadership in the achievement of environmental, health and safety compliance initiatives. This position will collaborate on the development of a comprehensive compliance management system and sustainability strategy within the business unit and across the company overall. Typical responsibilities include: interfacing and partnering with Corporate Environment, Health and Safety, Corporate Audit Services Department, and other key stakeholders on matters of compliance with EH&S laws, regulations, rules, and standards; leading the development of site-specific implementation plans for environmental programs and supporting EH&S compliance teams at operational facilities; consulting with operations management and staff to understand and implement EH&S compliance requirements; providing technical/professional support to operations management during compliance audits, including the development and implementation of corrective action plans; collaborating with business unit training and corporate training representatives on the development and implementation of compliance training programs; mentoring junior team members within the group; and other duties as directed.</p> <p>~cb~</p>
