

GRIFOLS

Grifols Biologicals Inc. has an immediate opening for an **Environmental Health and Safety (EHS) Engineer** in the Quality Control department at our Los Angeles facility. Grifols offers an excellent benefits package, including medical, dental, vision, 401(K) plan, life insurance, educational assistance, and 5 weeks of paid time off.

Grifols has been a leader in the healthcare industry since 1940 by creating innovative products and services based on the values of ethics, quality and responsibility. Grifols' activities focus on fulfilling the needs of its patients as well as healthcare professionals working in therapeutics, pharmacy, diagnostics and blood banking. For more than 60 years, Grifols has developed, manufactured and marketed products designed to improve human health. At its Los Angeles facility, Grifols manufactures plasma derived biopharmaceutical products of proven efficacy, quality and safety.

Position Summary:

- The Environmental Health & Safety Engineer (EHS Engineer) is responsible for maintaining the facility's Environmental Health & Safety (EH&S) compliance with all company, local, state and federal requirements. The EHS Engineer determines legal requirements, generates/ updates procedures and management systems, determines requirements for new engineering projects, monitors compliance to various regulatory programs, and generates reports to regulatory agencies and management. The EHS Engineer is also responsible for implementing continuous improvement programs established within the facility. This position communicates with other Grifols employees to facilitate cost saving or waste reduction projects/ programs.

Job Responsibilities:

- Promote awareness of environmental, health and safety impacts that require personal ownership and accountability.
- Communicate, as appropriate, with employees and regulatory agencies regarding the environmental, health and safety aspects and objectives of operations.
- Integrate safety and environmental objectives into the design of processes and operations as required.
- Assess the EH&S impacts and interactions of all business activities, products, and waste streams. This includes the efficient use of energy and other resources, as well as the reduction of waste and air emissions, particularly those that may present the greatest potential risk to safety, health or the environment.
- Meet or exceed all local, state, and federal regulatory requirements, as well as other EH&S requirements to which the facility subscribes.
- Verify EH&S compliance through periodic auditing and assessment.
- Continually improve EH&S performance including pollution prevention and cost reduction opportunities.
- Verify improvements through periodic review of EH&S objectives.
- Interact frequently with employees throughout facility in order to implement cost or waste reduction projects.
- Generate and maintain accuracy of EH&S documents and conduct periodic reviews as required.
- Interact with MSDS system and new chemical procurement process.
- Facilitate the EH&S new employee training program for the facility and other selected safety topics as required.
- Maintain accuracy of EH&S information in Dakota Audit system through annual reviews.
- Facilitate completion of ergonomic evaluations of workstations, recommending changes and purchase of accessories, and coordinating purchase and installation of corrective measures.
- Participate in accident investigations and follow-up on a case by case basis, as assigned by Safety

- Manager.
- Industrial Hygiene Testing: Perform sound surveys, noise dosimetries, and airborne chemical sampling/testing

Skills, Qualifications, and Education:

- Bachelors of Science in Environmental Engineering, Chemical Engineering, Mechanical Engineering or related discipline. Masters of Science or Business is desired.
- Minimum of six years industrial Environmental Health & Safety experience.
- Environmental compliance (RECLAIM program, SCAQMD, NPDES, SWPPP, City of Los Angeles Wastewater Program, RCRA Waste Program, TRI Form R Reporting, DOT Regulations, SB14 Waste Minimization Programs, SPCC Plan, etc.).
- Health and safety compliance and best practices (OSHA, NIOSH, ACGIH, NFPA, etc.)
- Accident investigation.
- Ability to obtain Certified Environmental Professional (CEP) certification.
- This position requires the ability to communicate effectively in the English language, both orally and in writing, with employees, customers, vendors and regulatory agencies.
- Must be able to sit for extended periods of time.
- Must be able to frequently lift/carry 0-17 pounds and up to 40 pounds occasionally.

Work Environment:

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable qualified individuals with disabilities to perform the essential functions.

- Work is performed in both office and production environments. The noise level in the work environment is usually moderate. Limited exposure to physical risk.
- Working off-shift or extended hours may be required based on business needs.
- This position may require employee to carry a pager/ and/or cell phone.

This document in no way states or implies that these are the only duties performed by the employee(s) occupying this position.
