Job Title:	Safety Engineer	Requisition Number:	7416
Functional Area:	Environmental Health & Safety	Work Location:	Interiors (Propulsion Sys) - Fairfield, CA

Job Description Summary: JOB SUMMARY

Serve as a resource to the EH&S department and management in the areas of explosive and general industry safety along with Department of Defense and BATF requirements. Provide advice, consultation, and technical expertise on safe working conditions and healthful work environments. Evaluate workplace exposures from an explosives, safety and health perspective. Assess and conduct accident investigations and job safety analysis. Conduct training for new hires as well as provide annual refresher training per company requirements. Manage some aspects of IIPP, make recommendations to reduce risk, and provide assistance in implementation. Manages the Process Safety Management program. Leads implementation and maintenance of the explosive safety program, housekeeping issues, and related safety programs. Manages Magazine compliance. Acts as primary point of contact for document and drawing review. Leads regular facility safety audits and provides a written report of audit findings. Provide follow up and tracking of any action items related to audits, incident investigations and any other actions for EHS. Actively participate as Incident Commander for the site Emergency Response Team. Develop, coordinate and present training programs for explosive, safety and health related subjects. Perform internal audits to determine compliance with Cal/OSHA regulations, DOD 4145.26-M, BATF and other local, state or federal guidelines. Recommend and implement necessary actions to ensure the safety and health of all employees, customers and visitors as well as compliance with all applicable regulations.

MAJOR DUTIES

(1) Responsible for interfacing with managers and employees to make them aware of the hazards in the surrounding work environment and provide them with recommendations to work

safely and minimize the hazards.

(2) Manage the Workers' Compensation program. Reduce lost-time injuries and insure the return-to-work program remains effective.

(3) Responsible for the development, implementation and maintenance of the Goodrich Explosive and Process Safety Programs.

(4) Review all procedures, drawings and documentation dealing with energetic material.

(5) Manage personal protective equipment program.

(6) Provide emergency first aid care as needed, as a member of the Emergency Response Team.

This job specification should not be construed to imply that these requirements are the exclusive standards of the position. Incumbents will follow any other instructions and perform any other duties as may be required by their supervisor. It is also Propulsion California's policy to make reasonable accommodations in the essential functions of the above referenced job description for otherwise qualified disabled individuals.

Basic Qualifications:

QUALIFICATIONS

(1) Practical knowledge and skills as would normally be obtained through a Bachelors Degree or equivalent work experience.

(1) Minimum of five years related experience and specialized explosive/hazardous waste courses or training, or equivalent combination of education and experience. Minimum five years Process Safety management, explosive/propellant safety experience is highly desirable.

(2) Ability to read, analyze, and interpret common scientific and technical journals, financial reports, and legal documents. Must possess strong oral and written communication skills.

(3) Ability to respond to common inquiries or complaints from customers, and employees.

(4) Ability to research, prepare and format training to effectively present information to employees, top management, public groups, and/or regulatory agencies.

(5) Ability to calculate Time Weighted Averages (TWA's) and other formulas dealing with Industrial Hygiene.

(6) Ability to apply principles of logic or scientific thinking to a wide range of intellectual and practical problems.

(7) Ability to work under stressful conditions and make sound decisions.

(8) Training as an EMT and Incident Commander is a plus.

WORKING CONDITIONS

(1) Frequently required to use hands, handle or feel, reach with hands and arms; and stoop, kneel, crouch, or crawl.

(2) Occasionally lift and/or move up to 50 pounds.

(3) Must have complete physical mobility and respiratory fitness needed to respond in emergency situations.

% Travel Required: 10 - 20%
