## ***Job Summary***

The successful candidate will have responsibility for specific environmental programs and will undertake varied projects

assigned to develop, implement, manage and monitor aspects of the environmental programs at the site level. The ideal

candidate is an enthusiastic, creative and professional with excellent communication skills.

Under the direction of the Senior Manager, EHS, the successful candidate will be responsible for the implementation,

coordination and advancement of existing and emerging environmental programs and initiatives.

This includes:

Interpreting complex environmental regulations and developing/maintaining processes that will ensure compliance with

Federal, State and local requirements;

Interfacing with regulatory agency representatives during on-site inspections and to address program needs;

Maintaining appropriate records and documentation;

Preparing and submitting required internal and external regulatory reports;

Identifying and implementing program improvement opportunities;

Partnering with all levels of internal client and site/corporate EHS organizations;

Acting as EHS representative for internal client organizations;

Participating in emergency response activities.
