<b>Position Description</b>	Occupational Safety leadership position reporting to the Safety and Health senior manager in Engineering, Operations, and Technology EHS. Working closely with EHS business partners and leaders in Operations, Engineering, and other functions, you will lead enterprise-wide teams to develop, implement, and maintain the strategies and tools required to

achieve workplace safety advancements. Position will lead teams within Boeing's Safety Now improvement program, including the effort to identify and address the most significant manufacturing risks to workplace safety, and partnering with stakeholders to implement high leverage solutions. Position will lead the Incident Investigation Process Management Team, to improve company incident investigation and mitigation processes and upgrade the current associated systems and tools. Position will serve as a technical expert for the company in occupational safety and health.

Candidates should have advanced communication, organizational, project leadership, and computing skills and be able to effectively analyze data and develop presentations. Candidates should have a working knowledge of effective safety programs, and understand and convey how these programs can support and enhance the Boeing production system. Additional knowledge or experience in internationally recognized safety management systems (e.g., OHSAS 18001) strongly desired.

**General**

- [ + ] Communication
- [ + ] Decision Making
- [ + ] Establish Strategic Direction

**Technical**

- [ + ] Applied Health/Safety Science
- [ + ] Technical Process Change

Technical bachelor's degree and typically 14 or more years' related work experience or a Master's degree with typically 12 or more years' or a PhD degree with typically 9 or more years' related work experience or an equivalent combination of education and experience. A technical degree is defined as any four year degree, or greater, in a mathematic, scientific

**Competencies**

or information technology field of study.

Knowledge of Lean+ is a plus.

**Other Job related information**

\*\*\* Please note that depending on the specific position, you may be required to pass additional medical tests, credit checks, and/or other requirements. These additional items are required for the Company to comply with various laws and regulatory rules.\*\*\*

Every job requisition has specific and unique requirements listed under 'Description', 'Competencies', and 'Education'. Applicants will increase their opportunities for consideration by demonstrating compatibility with these requirements in their resumes.

The job specifications - including competencies (knowledge, skills, abilities, and other characteristics), job-relevant work experience, education, and other requirements described in this requisition - will be the basis for applicant screening, including resume reviews, structured interviews and any other assessments used to support the hiring decision. All candidates considered for this position may be required to participate in a structured interview. The structured interview is a standardized method of evaluating candidates' job-related competencies to support an objective selection and promotion process.
