

Biosphere

The Weekly Bulletin of Biology

Biology Colloquium (Friday 2 PM in EH2132)

Dr. Robert Steneck, University of Maine

Title: TBA

- *Conferences and Workshops* — Graduate student Jessica Dooley (advisor: Dr. Hertel) presented her work on Bald Eagle space use on the northern Channel Islands at the 7th California Islands Symposium in Oxnard, CA, Feb. 5-7.
- *Research on California Biodiversity* — Dr. Paul Wilson (currently on sabbatical) has discovered another moss new to California, *Bryum schleicheri* will be now known from the high Sierra north to the high mountains of the Pacific Northwest
- *Outreach* — Dr. Steve Dudgeon and graduate students Christina Vasquez and Carly Ryan, along with some hermit crabs and colonies of hydroids, visited Old Orchard Elementary School for their annual Career Week
- *Biology Website* — The Biology website <http://www.csun.edu/biology/> has been going through major revisions this academic year. New pages in the areas of *Cellular/Molecular/Physiology* and *Genetics/Developmental* have recently been updated. If you have comments or suggestions on any of our website information please contact the appropriate website area committee members Dr. Mary-Pat Stein (*Cellular/Molecular/ Physiology*), Dr. Cindy Malone (*Genetics/Developmental*), Dr. Sean Murray (*Microbiology*), Dr. Larry Allen (*Marine Biology*), Dr. Tim Karels (*Ecology and Evolution*). Other website related comments and suggestions can be directed to Dr. Tim Karels
