The Partnership Between
California State University, Northridge
and Northridge Academy High School

About:
The joint relationship between Northridge Academy and CSUN provides a unique opportunity for the high school and university to develop richer curriculum and expanded learning opportunities for the students on both campuses.

Faculty from Northridge Academy regularly meet with their counterpart faculty at Cal State University Northridge to develop and plan curriculum. In addition, students at Northridge Academy have access to a wide variety of Cal State University Northridge resources, including check-out privileges at the CSUN Oviatt Library. In addition to a 9th Grade Bridge / Exploratory Academy, Northridge Academy has developed three academies, or small learning communities, that coincide with three major colleges at CSUN. They are: Health & Human Development, Arts, Media & Communication, and Careers in Education.
