## **Executive Summary**

### **Alternative Scheduling - Student and Faculty Survey**

During the summer 2005, the Provost of California State University, Northridge, asked that an ad hoc committee be formed to study the impact of potential alternative scheduling of classes. After much discussion, a preliminary report was issued that included, among other recommendations, the need to survey students and faculty for input on various issues associated with these alternatives. The Provost concurred.

Accordingly, during the spring 2005, a committee, chaired by Jerald Schutte (ERC and Center for Survey Research), and consisting of various members of the standing committees of the faculty senate and the then associated student body president, met on multiple occasions to construct an appropriate instrument accessing such opinions. As a result, the questionnaire, attached hereto, was given to a sample of CSUN students, using a stratified random sampling frame (taking into account class level, time of day for classes and college). As a result the sampling netted 787 student responses.

Simultaneously, the chair of each department was contacted and asked to distribute a similar form to faculty at their next department meeting. They were asked to have their faculty complete the form during the meeting, so that we would maximize the return rate and gather qualitative information resulting from those discussions. May 15<sup>th</sup> was given as the deadline for return of the forms by the departments. As a result, 206 faculty (approximately 20% of the population) returned questionnaires.

The data were coded and analyzed on three levels. The first compared relevant demographic characteristics to ERSS data to determine the margin of error for this particular sampling technique. The second generated marginal frequencies for the two populations on each of the questions, in an attempt to understand the context within which our students and faculty operate (e.g. distance from campus, method of commute, days on campus, class/teaching load), as well as days/times currently scheduled and the most desired days/times schedule (e.g. "how likely is it that you would take two three hour classes in one day, if offered). The third attempted to assess the relationship among desired times by background characteristics. The following is a summary of the results:

**Students Demographics:** With respect to the first issue, the student demographics are approximated within an average 6% margin of error: a) 66-33% females to males in the sample vs. 60%-40% in the student population; b) 75%-20% UD to LD in the sample vs. 64-25% in the student population; c) colleges: e.g. SSBS 14.4% in sample vs. 16.87% in population; HHD 10.84% in sample vs. 11.4% in population; Humanities 10.44% in sample vs. 10.3% in the population. See complete comparison in questions 24-26 of appendix.

**Student Information Trends:** Not surprisingly, these data demonstrate that more than 52% of our students live 11 miles or more from campus; two-thirds arrive on campus before noon; 81% drive cars; 68% commute from home (although nearly one-third do so from work or both); 53% are on campus 3-4 days per week; take predominantly 13-18 units per semester (55%); work 21 or more hours per week (43%); and nearly one in seven are currently enrolled in an online course (13.36%).

Moreover, more than 80% are here for classes on MW days, but only slightly more than half that on Fridays (46%). An average 28% take classes in the evening, during the week, but less than two percent on Friday evenings. Clearly these data indicate that students largely are on a four day week already. This is substantiated in conversations with the then AS president, who agrees; “most undergraduates consider the last day of the week to be Thursday”. Further, Only 12% of students are taking Saturday classes, one-eighth of those taking classes on M-TH

**Student Desired Schedules:** If not taking classes on Friday and Saturday is a function of student preference, the “desired” schedule should not vary from the “actual” schedule. If it is a function of university scheduling, it will. Looking at the data, there is no significant difference between actual and desired scheduled for M-TH. However, 60% more students (24% vs. 15%) desire to, then actually do, take classes on Friday afternoon and evenings. Moreover, nearly three times as many students desire to take classes on Saturday than are currently taking such classes (27% vs. 9%).

Moreover, we see that the students prefer 1 ½ hours (two days per week) or three hours (one day per week), nearly three to one over the traditional one hour (three days per week) format. Moreover, 51% of the students say, if offered, they are likely or very likely to take two classes in one day that each meet for three hours. Therefore, these findings, combined with the actual vs. desired schedule of students, produce a compelling argument for revising our schedule to MW, TTH, with Friday and Saturday reserved for faculty obligations and larger one or two day per week class scheduling. These data, of course, can only translate into a meaningful schedule change, if the faculty agree. Their results are as follows:

**Faculty Demographics:** While ERSS does not report the same scope of information on faculty, as students, it is clear that we have achieved meaningful sampling on at least two criteria: 1) we have received results by position, close to the actual numbers (from 59%-41% tenured, non-faculty vs. 56%-44% in the CSUN population); 2) we received information from 26 different sources (while this is not de facto evidence of 26 departments (i.e. 50%) of all departments responding, it can be construed as such, given that the questionnaires were distributed to department chairs and returned, for the most part, by same.

**Faculty Information trends:** As expected, somewhat more faculty live 11 miles or more from campus as students (63%); arrive on campus before noon (87%); drive cars (91%); are on campus three or more days (85%); and the modal teaching load is 7-12 units (65%); and finally, only 6.8% of the faculty teach online courses

Moreover, an average of 40% of those polled, teach Monday through Thursday days, whereas only 23% do so on Fridays and only 4% on Saturdays. Yet their desired schedule is somewhat more flexible. Curiously 50% more faculty desire to teach on Friday than actually do teach on that day (45% vs. 33%). Moreover, twice as many faculty desire to teach on Saturday, than actually do (17% vs. 7%). While the absolute percentages are small, and the margin of error somewhat large, remember that each faculty can handle 25-200 students, so the multiplier means many students in absolute terms. Moreover, only 10% of the faculty prefer 1 hour classes three times per week, and 56% would be likely or very likely to teach two three hour classes in one day.

**Conclusion:** There appears to be a scheduling disconnect. Many more students and faculty are willing to take and teach classes, in longer time duration, on Friday and Saturdays, than we are currently scheduling. Therefore, while many of the students are gone on Fridays anyway, it would appear those wishing to take classes during these latent periods could and would benefit from the revised scheduled outlined in the committee report.

## Provisionary Evaluation of Student Thoughts Regarding Alternative Course Scheduling

At the request of the Provost, a committee composed of faculty and staff is considering modification of the way courses are scheduled at CSUN. Please understand that your responses are voluntary and anonymous. However, your input is critical to the task. Therefore, we request you provide answers to the following questions concerning the campus's course scheduling options as requested below.

**1. How far from CSUN do you live:**

- ☐ on or adjacent to campus
- ☐ 1-10 miles
- ☐ 11-20 miles
- ☐ more than 20 miles

**2. What is the earliest time you arrive on campus:**

- ☐ Before noon
- ☐ Between noon and 5:00pm
- ☐ Evenings (After 5:00pm)

**3. How do you get to campus:**

- ☐ drive a car
- ☐ walk or bike
- ☐ take the bus
- ☐ ride share
- ☐ other means of travel

**4. From what starting point do you typically commute to CSUN:**

- ☐ Home
- ☐ Work
- ☐ Both

**5. How many days per week are you on campus:**

- ☐ 1-2
- ☐ 3-4
- ☐ 5 or more

**6. How many units do you normally take per semester:**

- ☐ 1-6
- ☐ 7-12
- ☐ 13-18
- ☐ more than 18

**7. How many hours per week are you employed:**

- ☐ I do not work
- ☐ 1-20
- ☐ 21-40
- ☐ more than 40
