Los Angeles as a Model of Urban Resilience

A resilient city is one that prepares to address shocks, such as natural disasters and the impacts of climate change, by addressing the ongoing physical, social, and economic challenges that can make it difficult to respond to disruptions. Join us for a conversation about Los Angeles's ability to respond to adverse events in a panel discussion led by Patt Morrison.

Tuesday, March 17th
6:00 p.m.
The Grand Salon | University Student Union

Reservations are requested.
For more information and reservations:
envca2015.eventbrite.com | 818.677.7169

This event is free of charge. Reception to follow. Parking is $6 per car at Information Booth #3 at Prairie Street and Zelzah Avenue.
Communication services (sign language interpreters, note takers, real-time captionists, or assistive listening devices) are available for this event. Requests for services must be submitted at least five (5) working days in advance.
