

Financial Economics Course of Study

This is not an Option in Economics, only a plan of study that you may choose to follow on your own; you would earn a B.A. in Economics, but these courses would appear on your transcripts and prepare you well for a serious MBA program or job that requires knowledge of macroeconomics and financial markets. Areas in grey are additional courses that apply specifically to this course of study (beyond what satisfies the requirements of the Economics Major). With an Economics Major, there is plenty of room to take these classes (there are 26 units of unrestricted electives in the Economics major).

Lower Division Courses (31 units)

Course	Units
MATH 150A Mathematical Analysis I	5
MATH 150B Mathematical Analysis II (requires C or better in MATH 150A)	5
MATH 250 Mathematical Analysis III (requires C or better in MATH 150B)	3
MATH 262 Introduction to Linear Algebra	3
SOM 120 or MATH 140 (Statistics)	3
ACCT 220	3
BUS 205 or ENGL 305 or ENGL 306	3
ECON 160 Principles of Microeconomics	3
ECON 161 Principles of Macroeconomics	3

Upper Division Courses (39 units)

Course	Units
ECON 310 Price Theory and Applications	3
ECON 309 The Use and Interpretation of Data	3
ECON 311 Money, Banking and the Federal Reserve	3
Three 300 or 400 level economics electives	9
ECON 401 Macroeconomic Theory	3
