

Economics Major with International Emphasis

New students (entering in 2007-08) may select coursework that gives them an emphasis in international business and economics (as outlined below).

If you are interested in international economics, you may select economics electives that focus your course of study on international economics and add international business electives to the economics major. The plan below adds ALL of the international business electives offered by the CSUN College of Business and Economics and their prerequisites. You may want to select those of interest to you. Many courses are not offered frequently, you would have to take the courses when they are offered and rearrange the remainder of the schedule. Pick these elective courses if you are interested in the international aspects of business and economics.
