

Chemistry 333

How to Succeed in Chemistry 333

1. Have a positive attitude.
2. Be organized.
3. Develop good study habits
 - a. Devote a regular amount of time to Chemistry 333 each day.
 - b. Find a quiet place to study where you can concentrate.
 - c. Read the chapter assignments in Wade, *Organic Chemistry*, before coming to class.
 - d. Attend all the lectures.
 - e. Take good lecture notes. Review the lecture notes frequently.
 - f. Rewrite lecture notes or make flash cards of topics covered in class.
 - g. Use the lecture notes as a guide for reading Wade, *Organic Chemistry*, a second time.
 - h. Complete all of the discussion problem sets thoroughly.
 - i. Find a study partner or form a study group. Work on problems independently and then together.
 - j. Do all the assigned homework problems. Use the textbook or solutions manual to check your answers after you have worked the problems.
 - k. Do problems from old examinations for additional practice.
 - l. Visit the Learning Resource Center (LRC) or the Chemistry Tutoring Center for help. Contact the Chemistry and Biochemistry Department Office if you want a private tutor.
 - m. Make a list of questions about topics and problems that you don't understand. Ask the instructor, an LRC tutor, or a friend for explanations. Do so promptly.
 - n. Keep up to date!
4. Persevere and be determined to succeed. You will!
