A typical (simple) mathematical expression:  $% \left( \frac{1}{2}\right) =\frac{1}{2}\left( \frac{1}{2}\right) \left( \frac{1}{2}\right) \left$ 

$$\ln t = \int_1^t \frac{dx}{x},$$

or a better displayed expression has the form:

$$\ln t = \int_{1}^{t} \frac{dx}{x}.$$
