Five-county population of persons of Iranian ancestry is 126,584 and change in that population between 1990 and 2010 is an increase of 57,747.

Five-county population of persons of Iranian ancestry is 126,584. Census ACS data are from a five-year sample. Bar length indicates proportion of all valid tracts included in a category. In most cases a category includes 2, 3, 5, 10, 30, 40, or 50 percent of the included tracts. The bar length of the excluded tracts is not related to its tract count.
