

math 396L

math for 3D graphics

Fall 08 - week two

intro to MATLAB

overview

- today, we will read the chapters 0-6 and 10, 11, 18 and 19 of MATLAB primer and practice the commands listed there
- after we complete this, we will visit other references and work out some simple problems from the command line (no M-files yet)
- the handout with these problems probably contains more than you can workout during the lab session, you'll need to finish them and turn in the solutions next week

MATLAB primer

go to:

<http://www.glue.umd.edu/~NSW/ench250/matlab.htm>

or to the course webpage and find the link to MATLAB primer

start reading and trying the commands listed...
