17	16	-			13											
18	17															
	21   Once you have entered all your data,															
highlight the area with the data, including the																
	<ul> <li>labels &amp; select marked line, under charts.</li> </ul>															
24																
25																
27																
28																

# **STEP 3: INTERPOLATING**

Scatter Other Line Column Win/Loss Select Switch Plot		Media						
D E F G H I J	K L M N O All Shapes							
Escape Attention	Chart							
14								
5	Back/Forward Show All Search Excel Preferences							
10								
10	Selected chart							
4 8	Empty cells plotted as							
12	<ul> <li>Not plotted (leave gaps)</li> <li>Zero</li> </ul>							
6	• Interpolated							
4		10 million 1						
3 9	Plot visible cells only							
9 2		001						
	Chart ScreenTips	00						
1	✓ Show chart names on hover ✓ Show data marker values on hover	1 24 1						
13		1 7						
	Description							
	Chart							
entered all your data,	Controls how Excel plots charts.							
vith the data, including the								
arked line, under charts.								
		16						
	Cancel OK							

Skip this step if your data points are interpolated.

If not, go to excel preferences, select chart & then select the interpolated option. Click OK and be sure to check that your data points are not connected.

# **STEP 4: FINAL PRODUCT**
