

Fiber Optic Laboratory

Department of Electrical Engineering, CSU Northridge

The Fiber Optic Communication Laboratory is located in JD 1550. This is one of the newest laboratories in the department. Its use is primarily for conducting experiments and run simulation for the instructional laboratory ECE 666L, masters thesis projects, and faculty / student research which includes recent developments and applications in fiber optics.

Graduate students who are interested in using the lab for their graduate projects please contact Dr. Nagwa Bekir at (818) 677-3201 or email her at nbekir@csun.edu for more information.
