APIX POLYBOB COMPANY

Please read the Apex Polybob Company case on pages 123 through 124 of the text. This case is at the end of the material requirements planning chapter (4) and involves several aspects of scheduling and inventory management.

Required: Your assignment as a consulting team is to assist Jim Gould and Ken Mack. You are expected to write a report to them. (The suggested length of your report is approximately ten to twelve pages.) The report should include an analysis of the problems facing Apex Polybob along with suggested remedies. In your report include answers to the six questions at the end of the case.

The written report for your team is due Monday, October 18. Your team is also required to present one oral report on a case this semester. You may wish to present one on October 18 for Apex Polybob or one on November 22 for the second case.

Teams will be formed Monday, September 27. Please complete a Humanmetrics questionnaire which will be linked to my web site by September 27.
