

My Personal Code of Environmental Ethics
by Peggy Clevenger

Former student in LSRC/RTM 251

1. I will change my activities which I know contribute to the earth's early demise.
2. I will educate my children and myself on ways to help the environment.
3. I will plan more activities for the out-of-doors, so I can show my children and myself how much we have to gain or lose.
4. In choosing food I will continue not to eat chicken or beef.
5. I will begin to change my home so it can become more energy efficient.
6. I will not use certain products that I know are environmentally unsafe.
7. I believe life begins at conception and that all life is a gift.
8. I will continue to give donations to organizations which I believe promote better health for people and animals.
9. I will walk whenever possible to avoid using precious fossil fuels.
