SYLLABUS

Course Title: Critical Reasoning

Course Number: PHIL 200 Online (Fall 2010)

Ticket Number: 13484

Prerequisites: Completion of GE Analytical Reading/Expository Writing; either GE

Mathematics or MATH 210

CONTACT INFORMATION:

Instructor: Dr. Weimin Sun Office: Sierra Tower 505

Phone: 818-677-6461 (voice mail available at this number)
Email: weimin.sun@csun.edu (email checked everyday)
Office Hours: Tues. Thurs. 2.00-3.30 PM, or by appointment

CATALOG DESCRIPTION:

Not open to students who have completed PHIL 100. Examination of the relationship between logic and language. Accelerated introduction to the concepts essential to the identification, analysis and evaluation of arguments, with attention to deduction, induction and common fallacies. Emphasis on the application of these concepts. (Available for **General Education, Basic Skills, Critical Thinking**)

INSTRUCTOR'S DESCRIPTION:

This course satisfies the Critical Thinking component of the Basic Skill section of the General Education Program, which recognizes critical reasoning as a fundamental competence. Courses in this section of General Education take reasoning itself as their focus. Their goals are to provide students with criteria and methods for distinguishing good reasoning from bad and to help students develop basic reasoning skills that they can apply both within a broad range of academic disciplines and outside the academic environment. Students are expected to acquire skill in recognizing the logical structure of statements and arguments, the ability to distinguish rational from non-rational means of persuasion, skill in applying the principles of sound reasoning in the construction and evaluation of arguments, and an appreciation of the value of critical reasoning skills in the pursuit of knowledge.

GOAL:

Students will analyze information and ideas carefully and logically from multiple perspectives and develop reasoned solutions to problems.

STUDENT LEARNING OUTCOMES:

Students will:

- 1. Explain and apply the basic concepts essential to critical examination and evaluation of argumentative discourse;
- 2. Use investigative and analytical thinking skills to examine alternative, explore complex questions and solve challenging problems;
- 3. Synthesize information in order to arrive at reasoned conclusions;
- 4. Evaluate the logic and validity of arguments, and the relevance of data and information;
- 5. Recognize and avoid common logical and rhetorical fallacies.

COURSE OBJECTIVES:

Students will:

- 1. understand and be able to apply the basic concepts essential to a critical examination and evaluation of argumentative discourses: e.g. argument/premise/conclusion, deductively valid argument, inductively strong argument, sound statistical argument, and the scientific method.
- 2. recognize and avoid common logical and rhetorical fallacies;
- 3. recognize and be able to evaluate deductive reasoning;
- 4. recognize and be able to evaluate inductive reasoning;
- 5. recognize and be able to evaluate statistical reasoning;
- 6. recognize and be able to evaluate scientific reasoning:
- 7. be able to apply the truth table method and Venn diagram to check validity;
- 8. understand and develop logical skills to evaluate statements and arguments based on available information and data;

The SLOs are targeted by the corresponding COs as follows:

SLOs	(1)	(2)	(3)	(4)	(5)
Course Objectives	1	4-6, 8	1, 8	2-7	2

REQUIRED TEXTS:

The Power of Critical Thinking, 3rd edition, by Lewis Vaughn. Oxford University Press.

Earlier editions (such as the 2nd edition) are acceptable.

Online Course:

This is a Online Course with Moodle: all the course materials and assignments will be delivered online via Moodle, accessed at http://moodle.csun.edu/. On each Monday I will post a new lecture, and before Wednesday I will pose a practice quiz and a quiz every week (except the weeks when we have an exam). Discussion forums are also available for you to post questions

and concerns.

This course will be available to you once you are enrolled in this class. Occasionally you will also get email notifications about class news, and all emails will be sent to your CSUN account. Please check it regularly or have it forwarded to your regular email.

If you are not familiar with Moodle, please visit

http://www.csun.edu/at/teaching/tools/moodle.html for more information. In particular, visit http://www.csun.edu/at/training/moodle/lynda.com/students/ for a two-hour video training class.

Course Requirements:

- 1. Studying the course materials diligently and regularly;
- 2. Working at the problem sets to master the materials;
- 3. Finishing all the required assignments.

Strategies for Success in this class:

- 1. Study the book and the lecture slides **carefully** and study them **regularly**: critical reasoning courses have a strong degree of continuity if you are not doing well in the beginning, it will be very difficult for you to do well on the later materials since they rely on earlier knowledge.
 - a. Find your pace of work in the week. Finish everything by the end of the week. Do not procrastinate!
- 2. Work on the practice quizzes before you try the actual quizzes; learn from your own mistakes.
- 3. Finish all the assignments on time.
- 4. Come to my office hours if you have any questions, concerns, or simply feel that you are struggling in class.
 - a. Warning: this is a difficult class for many students! If you feel you are struggling, you are not alone and you need to seek help at the earliest stage.

Course Grading:

• Two exams 70 % (35% each)

• 12 Quizzes 30%

• Final grade is a weighted sum of all the above components calculated by percentage. The final letter grade will be based on the following table:

Final %	≥92	90- 91.9	88- 89.9	82- 87.9	80- 81.9	78- 79.9	72- 77.9	70- 71.9	68- 69.9	62- 67.9	60- 61.9	<60
Letter Grade	A	A-	B+	В	В-	C+	С	C-	D+	D	D-	F

COURSE SCHEDULE and READING ASSIGNMENTS

Date	Content	Reading Assignment				
		(Chapters refer to the Vaughn				
		Textbook; lectures are online)				
Week 1:	Introduction to the course;	Ch. 1 The Power of Critical Thinking				
8/23		Recommended: Course Syllabus;				
		Lecture 1;				
Week 2:	Basic Notions	Ch. 2: Obstacles to Critical Thinking				
8/30	Quiz 1	Lecture 2;				
Week 3:	Argument Basics & Argument Analysis	Ch. 3 Making Sense of Arguments				
9/7	Quiz 2	Lecture 3;				
Week 4:	Reasons for Belief (and Doubt)	Ch. 4 Reasons for Belief and Doubt				
9/13	Quiz 3	Lecture 4;				
Week 5:	Common Fallacies in the Reasoning	Ch. 5 Faulty Reasoning				
9/20	Quiz 4	Lecture 5;				
Week 6:	Statistical Reasoning	Ch. 8: Inductive Reasoning –				
9/27	Quiz 5	Enumerative Induction (pp. 284-297)				
		Lecture 6;				
Week 7:	Analogical Induction;	Ch. 8: : Inductive Reasoning –				
10/4	Causal Reasoning	Analogical and Causal (pp. 302-327)				
	Quiz 6	Lecture 7;				
Week 8:	Exam I	Recommended: All above				
10/11		Lecture 8 (review);				
Week 9:	Propositional Logic-1:	Ch. 6 Propositional Logic- Part I: (pp.				
10/18	Logical connectives and the Truth table	217-228)				
	Symbolization	Lecture 9;				
	Quiz 7					
Week 10:	Propositional Logic-2:	Ch. 6 Propositional Logic- Part II (pp.				
10/25	Validity check	231-238)				
	Quiz 8	Lecture 10;				
Week 11:	Categorical Logic-1:	Ch. 7 Categorical Logic – Part I (pp.				
11/1	Categorical Statements	251-268)				
	Quiz 9	Lecture 11;				
Week 12:	Categorical Logic-2: Validity check	Ch. 7 Categorical Logic – Part II (pp.				
11/8	with Venn Diagram	269-276)				
	Quiz 10	Lecture 12;				
Week 13:	Scientific Reasoning—Inference to the	Ch. 9: Inference to the Best Explanation				
11/15	Best Explanation	Lecture 13;				
440-	Quiz 11					
11/22	Thanksgiving Break					
Week 14:	Evaluation of Hypothesis	Ch. 10: Judging Scientific Theories				
11/29	Quiz 12	Lecture 14;				
Week 15:	Exam II	Recommended: everything since Exam I				
12/6	This schodule is tentative and is un to revision. Such	Lecture 15 (review);				

Note: This schedule is tentative and is up to revision. Such revisions (if any) will be announced online.
