INTRODUCTION
This guide provides setup instructions to connect to CSUN’s encrypted wireless network (WPA2). Please note that this network is an additional resource and does not replace the current CSUN wireless network.

iOS WPA2 Setup
To begin the setup process, please verify that Wi-Fi has been enabled.

1. From the Home menu, select Settings.
2. In the Settings window, select Wi-Fi from the list of available options.
3. Select Other.
4. Under Name, enter csun_wpa2 (lower-case).
6. Return to Other Networks and enter your username and password.
7. Select the Join button to complete the process.

Note: If setup is successful, the network displays under Wi-Fi settings and a checkmark indicates that you are connected.

iOS WPA2 Password Update
To begin the setup process, please verify that Wi-Fi has been enabled.

1. From the Home menu, select Settings.
2. In the Settings window, select Wi-Fi from the list of available options.
3. Select the arrow button for the Wi-Fi network selected (csun_wpa2).
4. Select Forget Network.
5. Select Forget.
6. Go back to view the network connections.
7. Select the Wi-Fi network, csun_wpa2.
8. Enter your CSUN user ID and password and accept the certificate.
9. Select the Join button to complete the process.

NEED HELP?
Contact the IT Help Center by phone (818-677-1400), online at (http://techsupport.csun.edu), or in person in (Oviatt Library, Room 33).
