THE STAR SPANGLED BANNER
Snare Drum Part

Compose a snare drum part to *The Star Spangled Banner*.

Compose your own snare drum part to match your interpretation. However, it must include a drum roll at the beginning before the whole orchestra enters.

Your snare drum part must be completed using music notation software (Finale, Sibelius, etc.) and use proper page-layout (equal margins, title, composer and arranger’s names, legible ink, even spacing of measures, etc.).

Helpful reminders:
- include the tempo, dynamics, articulations as they should appear in an *instrumental* score
- you may use either a 5-line or a 1-line staff, but format it properly for a non-pitched percussion instrument.
- Keep it reasonable! Be reasonable to your classmate who will be performing your drum part.
- Make sure that the measure numbers on your snare drum part align with the measure numbers in the score.

Print and bring TWO copies of your snare drum part on the due date:
one for the percussionist in our class and the other for Dr. Stoffel
