

Entry Level Field Technician Or Newly Certified CSST

Please reply to this ad with your current resume and a cover letter indicating the city in which you live, and why you would be a good candidate for this position. Please email jobpostings@ellisenvironmental.com.

Ellis Environmental, Southern California's leader in commercial asbestos and lead-related testing and management services, is looking for an entry level field technician to join our expanding team. Must have a college degree in an environmentally-related field (Environmental Health & Safety, Environmental Studies, Public Health, etc.) and a desire to become a Certified Site Surveillance Technician (CSST). We also welcome resumes from newly-certified CSST candidates. Supervised, on-site training will be provided.

The right candidate will possess strong verbal and written communication skills, legible handwriting (for field reports), a can-do attitude and a reliable vehicle with a current, clean CA driver's license. Job will be part-time to start, progressing to full time.

Job duties will include assistance with asbestos/lead surveys and clearances, monitoring abatement projects, indoor air quality and mold/moisture assessments, Phase I site surveys, and health and safety audits occurring throughout the LA basin (Burbank, Glendale, Hollywood, Torrance, Long Beach, etc.). Some weekend and night work is required.

Job requires some physical strength – must be capable of carrying out field sampling activities, which can include crawlspace inspections, roof sampling, and involve carrying moderately heavy equipment (pumps, ladders, tools etc.).

Ellis Environmental provides a competitive salary, training, medical and dental insurance, and paid vacation/sick time for full time employees. Mileage costs are reimbursed.
