

Biology Colloquium

*Co-sponsored by: Undergraduate Research Initiative for Student Enhancement (U-RISE) and Bridges-to-the-Doctorate Program (BPD); ^NCOMPASS; #Distinguished Speaker

SPRING 2023

Jan. 27		Organizational Meeting
Feb. 3	Virginia Vandergon CSUN	Phenomenal science
Feb. 10	Martin Humphries U. Manchester	Mechanisms of mechanotransduction in pancreatic cancer
Feb. 17	*Danielle Schmitt UCLA	Illuminating compartmentalized metabolic signaling in single cells
Feb. 24	Ernesto Weil U. Puerto Rico	Fifty years of disease impacts in coral reefs and other marine communities: stressors, drivers and consequences
Mar. 3	*Kristen Dias UC Riverside	A Therapeutic approach in targeting Galectin-3
Mar. 10	*Julien Sage Stanford University	Modeling brain metastasis of lung cancer to identify novel therapeutic strategies
Mar. 17	#Carlos Lopez Altos Lab	Multiscale mechanisms of mammalian cell death using systems modeling methods
Mar. 24	No seminar	Spring Break!
Mar. 31	No seminar	Caesar Chavez Day
Apr. 7	*Katayoon Dehesh UC Riverside	How a plastidial metabolite regulates intricate networks of adaptive responses
Apr. 14	^Kayvan Niazi Sagitaris Bio	Current trends in biopharmaceuticals: will the future ever happen?
Apr. 21	^Richard Myers Takeda	Gastrointestinal Drug Discovery at Takeda Pharmaceuticals: bringing innovations to patients
Apr. 28	*Michelle Dawson Brown University	Physical and metabolic landscapes of therapy induced senescence and polyploidy in an evolving tumor microenvironment
May 5	^Lisa Barnett Takeda	Celiac disease: growing burden and unmet needs

Fridays at 2 PM

Location: CR5125

Organizers: Drs. Ray Hong and Maria Elena Zavala
