CAPTURED Web Designer

Job Description

We are looking for a Web Designer to create a high quality and visually appealing digital version of the CAPTURED Multi-Media Student Research Journal. Primary duties include conceptualizing and implementing creative ideas, as well as creating visual elements that are in line with the journal.

Qualifications

- Proficient in creative platforms such as HTML/CSS/FLASH/In-Design.
- Experience in web designing and editing.
- Excellent organizational and communication skills.
- Effective visual design skills.
- Knowledge of and ability to post ADA compliant documents.
- Excellent time management and multi-tasking skills.

Responsibilities

- Create a quality and visually appealing website for the CAPTURED Multi-Media Student Research Journal.
- Make suggestions for website updates.
- Works with supervisor, production team and Graphic Designer to develop and post journal.
- Review and organize submissions electronically.

Please send your resume, cover letter, artistic/creative sample(s) and 1 letter of recommendation to us through the on-line career resource ‘Handshake’
