

Fall 2014 Colloquia and Special Talks

Dr. Ding Fangyuan

Caltech

"Single Molecule Mechanical Sequencing"

Wednesday, September 10, 2014 - 3:40 p.m.

LO 1127

Dr. David Mobley

UC Irvine

"Using computer modeling to guide pharmaceutical drug discovery"

Wednesday, September 17, 2014 - 3:40 p.m.

LO 1127

Dr. Oleg Udalov

CSUN - Physics & Astronomy

"Electron Transport Properties of Composite Ferroelectrics"

Wednesday, September 24, 2014 - 3:40 p.m.

LO 1127

Dr. Prashanth Jaikumar

CSU Long Beach

"Neutron Stars: The Astrophysics of Dense Matter"

Wednesday, October 8, 2014 - 3:40 p.m.

LO 1127

Dr. Thomas Gredig

CSU Long Beach

"Control of Magnetic Properties through Design of Nanostructures with Iron Phthalocyanine"

Wednesday, October 15, 2014 - 3:40 p.m.

LO 1127

Dr. Kevin Hickerson

UCLA

"Measuring the Neutron Lifetime and Probing for New Physics Using Ultracold Neutrons"

Wednesday, November 5, 2014 - 3:40 p.m.

LO 1127

Dr. De-en-Jiang

Department of Chemistry, University of California, Riverside

"Understanding and Designing Materials from Computation"

Friday, November 7, 2014 - 11:00 a.m.

LO 1100

Dr. Ertan Salik

Cal Poly Pomona

"Interferometric optical fiber sensors and their applications in physical, chemical and biological sensing"

Wednesday, November 12, 2014 - 3:40 p.m.

LO 1127

Dr. Luisa Rebull

Spitzer Science Center & Infrared Science Archive, Infrared Processing and Analysis Center, Caltech

"YSOVAR: Mid-Infrared Variations in Young Stars"

Wednesday, November 19, 2014 - 3:40 p.m.

LO 1127
