LENGTH: 30 minutes

PREPARED BY: Michael Anderson, iXP Corporation

DATE PREPARED: January 6, 2015

APPROVED BY: \_\_\_\_\_

*Clare H. Johnson*

DATE APPROVED: \_\_\_\_\_

*1/6/15*

---

#### I. Performance Objectives/Job-Related Objectives:

The purpose of this training is to train investigative staff on how to use the Intelligent Video Analytics (IVA) System forensic capabilities. Investigators will demonstrate a functional level of competency and understanding of how to create, submit and save IVA System searches.

#### II. Type of Instruction:

The instructor will review the program features and user interface controls with the student. The student will demonstrate understanding by performing searches of recorded video.

#### III. Course Outline:

##### A. The User Interface

1. IVA search functions.
2. Developing search criteria.

3. Submitting Searches and evaluating IVA search results.
4. Saving search criteria for future use.
5. System limitations.
6. Using the IVA system in conjunction with the Milestone system.

#### IV. Practical Exercise

- A. Designing and submitting various searches.

#### V. Closing

- A. Questions & Comments
