ABOUT THE PROGRAM

The Master of Urban Planning provides a broad based education in urban planning, especially as it is practiced in the State of California, where a wide range of state laws and mandates have created a planning environment which is distinct from its practice in much of the United States. The degree's curriculum is thoroughly grounded in the academic and applied dimensions of the profession. Classroom experience emphasizes key theoretical aspects of urban planning, while practical exercises and field experiences address how planning problems are addressed at the local and regional level.

The 36-unit master’s degree in urban planning is designed to be completed in two academic years. The degree program cohort is driven with new class cohorts beginning each year in the Fall Semester. Once a cohort starts, no other student will be accepted into the specific cohort.

This degree is designed especially to serve the needs of working students and professionals. Classes are scheduled for evenings and Saturdays, and are scheduled sequentially over the course of the two year program. It is intended that the students receive as much exposure to different professional planning environments as possible through field experiences and assignments in the Los Angeles metropolitan area.

COURSEWORK INCLUDES:

Contemporary Urban Planning in the US • Principles of Urban Planning • Sustainable Development & Environmental Analysis • Planning for Communities and Local Economic Development • Policy Analysis & Implementation • Planning Law • Visual Communication Skills for Planners • Quantitative Analysis • Qualitative Research in Urban Planning • Seminar in Comprehensive Planning • Field Project in Urban Planning • Professional Project

Total Units Required for MUP Degree: 36
