Queer Terminology

Please note that language is continually changing and it is important to use the term that the individual self-identifies with. This is by no means and exhaustive list of terminology used in the queer community.

ALLY
Someone who confronts heterosexism, homophobia, biphobia, transphobia, and heteronormative privilege in themselves and others out of a concern for the well-being of LGBTQ people and believe that heterosexism is a social injustice.

AMBIGUOUS GENITALIA
Many intersex activists contest the use of this phrase to describe their bodies because the ambiguity is with the society’s definition of male and female rather than their bodies.

ANDROGYNE
Person appearing and identifying as neither male nor female, presenting a gender either mixed or neutral.

BIPHOBIA
The fear, hatred, or intolerance of bisexual people.

BISEXUAL
An individual who is physically, romantically, and/or emotionally attracted to men and women. This attraction does not have to be equally split between genders and there may be a preference of one gender over others.

BUTCH
A masculine-appearing person, usually a female. A culturally specific term fitting U.S. hegemonic masculinity.

CISGENDER
A person whose gender identity is in line with their biological sex. The use of this term (or “cis”) is used to de-stigmatize the difference between transgender and non-transgender people instead of using terms such as “normal” “natural” or “biological”.

FEMME
A feminine-appearing person. A culturally specific term fitting U.S. hegemonic masculinity.

GENDER

LGBT
An acronym which stands for “Lesbian, Gay, Bisexual, and Transgender.” Other versions may add “Q” for Queer or Questioning, “I” for intersex, and/or “A” for allies. Some may prefer to list the acronym as TBLG to place Trans people in a position of importance and to rectify the way trans has historically been omitted, devalued, or excluded.

GENDER DYSPHORIA
A 2013 revision for the outdated Gender Identity Disorder.
A term of psychiatric establishment which refers to a radical incongruence between an individual’s birth sex and their gender identity. An old medical term describing intersex people. Many intersex activists reject this word due to the stigmatization arising from its mythical roots and the abuse that medical professionals inflicted on them under this label. Some intersex people use this word as a “pride word” like “queer” and “dyke,” but non-intersex people should avoid this term.

QUEER
Queer is a term which has been reclaimed by members of the LGBTQ community to refer to people who transgress culturally imposed norms of heterosexuality and gender traditionalism. Queer might be broadly defined as resistance to regimes of the “normal”. Although still often an abusive epithet when used by bigoted heterosexuals, many queer-identified people have taken back the word to use it as a symbol of pride and affirmation of difference and diversity.

SEX
Separate from gender, this term refers to the cluster of biological and chromosomal features associated with maleness and femaleness in the human body, found at birth and developed during puberty. Sexual dimorphism is often thought to be a concrete reality, whereas in reality the existence of Intersex point to a multiplicity of sexes in the human population. Sex is often used synonymously with gender in this culture. Although the two terms are related, they should be defined separately to differentiate the biological (“sex”) from the socio-cultural (“gender”).

Trans and gender-variant people may identify with any sexual orientation, and their sexual orientation may or may not change before, during, or after gender transition.
