

Shop Equipment Safety Checklist – Metal Shear

Da	te:			Name of Assessor:							
Dept:				Building & Room:	Shop:						
Machine Manufactu				urer: Model:	Serial No:						
Supply Voltage: V □1 phase □3 phase											
OEM Operator's Manual Readily Available? □Yes □No											
All items marked "NO" must be corrected.											
#	YES	NO	N/A	Checklist Item	Comment	Date Corrected					
Section A – Installation											
1				The machine is securely restrained to prevent movement in accordance with the machine manufacturer's recommendations or sound engineering practices. 8 CCR §3328(d)							
2				The machine's electrical attachment plug is connected directly to the building's wiring and that wiring's ampacity is rated for at least 125% of the machine's full load current.							
				24 CCR 3 §670.4(A) (2022)							
3				The machine's power cord and plug are in good condition with no cuts or fraying of the insulation.							
				8 CCR §3328(c)							
4				The machine is equipped with a means to promptly disconnect power, such as a switch, in case of emergency. 8 CCR §4001							
5				If the machine is powered by permanent conductors from the building's wiring, the incoming power supply circuit is terminated at a disconnecting means located immediately adjacent to the machine. 24 CCR 3 §670.4(B) / NFPA 79 §5.1.9.6 (2021)							
6				The disconnecting means is legibly marked to indicate the equipment it disconnects. 24 CCR 3 §110.22 / NFPA 79 §5.1.9.2 (2021)							
7				All disconnecting means enclosures are marked with a safety sign in accordance with ANSI Z535.4 to warn qualified persons of potential electric shock and arc flash hazards. 24 CCR 3 §110.16 / NFPA 70E §130.5(H)							

#	YES	NO	N/A	Checklist Item	Comment	Date Corrected			
8				A minimum of 36 inches of clearance is provided in front of disconnecting means to ensure safe maintenance.					
				24 CCR 3 §110.26 (2022)					
9				A written and verified Hazardous Energy Control procedure (Lock Out Tag Out / LOTO) is readily available for the machine.					
				8 CCR §3314(G)					
Section B – Safeguarding									
1				All portions of the cutting blade are guarded except that portion at the point of operation. 8 CCR §4227(a)					
				Hold downs are sufficiently guarded.					
2				8 CCR §4227(b)					
3				The back side of the shear is guarded by an awareness barrier or pressure sensing safety device (PSSD).					
				8 CCR §4227(e)					
4				Foot-operated controls are protected from unintended operation.					
				8 CCR §4185					
5				The foot treadle is enclosed to prevent contact by personnel.					
				8 CCR §4184(a)					
Sec	ction C	– Ind	ustria	l Hygiene					
1				A noise survey has been performed while the machine is in normal operation.					
				8 CCR §5097(b)					
Section D – Housekeeping									
1				Hand tools are provided for retrieving all scrap pieces with potentially sharp edges and waste is being placed in hard-sided waste containers on at least a daily basis. 8 CCR §3330(a)
