### Academic Degree Major Option

In order to meet subject matter by degree major, the degree major must correspond to the authorization to be listed on the teaching credential. The current statutory language does not provide leeway for the acceptance of closely related subjects; **the match must be exact**. At this time, the Commission will also accept applied majors in the single subject credential areas (e.g., Applied Mathematics, Applied Physics) and exact majors in one of the single subject areas that may have additional modifiers/concentration (e.g., Biology: Environmental Biology; Art: Art History; and Physical Education: Kinesiology). Master's or doctoral degrees completed by a candidate in the exact area of the credential being sought may also count as verification of subject matter competence.
