Spring 2020 Colloquia and Special Talks

Stuart Lindsay
   “The Incredible Secret Electronic Life of Proteins”
   On Wednesday, January 22, 2020
   Donald Bianchi Planetarium, BP 3100

Rodney D. Priestley
   “Direct measurement of the local glass transition in diblock copolymers”
   On Wednesday, January 29, 2020
   Donald Bianchi Planetarium, BP 3100

Yasuhiro Hasegawa
   “Formation of Giant planets and the origin of their heavy elements”
   On Wednesday, February 5, 2020
   Donald Bianchi Planetarium, BP 3100

Ran Cheng
   “Antiferromagnetic Spintronics- A New Twist in Ultrafast Materials”
   On Wednesday, February 12, 2020
   Donald Bianchi Planetarium, BP 3100

Luat Vuong
   “Plasmonics, and some optics-related data science and machine learning problems”
   On Wednesday, February 19th, 2020
   Donald Bianchi Planetarium

Dr. Marco Dolci
   “Jet Propulsion Laboratory”
   On Wednesday, February 26th, 2020
   Donald Bianchi Planetarium

Yeimy Rivera
   “A comprehensive view of solar eruptions with future multi-messenger solar observations”
   On Wednesday, March 4th, 2020
   Donald Bianchi Planetarium
