

Information and Communication Technology Accessible Technology Procurement

Vendor Accessibility Assessment

Product Name:

Company:

Date (MM-DD-YYYY):

Introduction

It is the policy of the California State University (CSU) that information & communication technology (ICT) purchases must be accessible to all students, faculty, staff and the public regardless of disability. Per this policy, vendors who provide Information and Communication Technology (ICT) products to CSU campuses have an obligation to work with each campus to mitigate any accessibility concerns in the products they are providing.

At CSUN, the Technology Procurement Accessibility Group oversees the procurement of ICT to ensure the most accessible solution is purchased. Vendors whose products have been identified to impact a high volume of students, faculty, and staff at CSUN will be asked to complete the Vendor Accessibility Assessment Packet. Take a few minutes to answer the following questions.

1. What is the organizations understanding of accessibility as a functional requirement?

2. Has the organization created an accessibility policy?

Yes

No

If Yes, what is the policy:

If No, explain why:

3. Does the organization have a designated person or entity responsible for accessibility?

Yes

No

If Yes, please provide a name:
