

MAC OS - ACCESSING CSUN'S NETWORK - QUICK GUIDE

INTRODUCTION

This guide provides setup instructions to connect to CSUN's network (EduRoam).

*The benefit of connecting to the 'eduroam' network is the ability to access the Internet at other participating institutions by using your **CSUN email address** and password.*

SETTING UP THE EDUROAM NETWORK

The following provides instruction on how to set-up your EduRoam wireless network using Mac OS. If you are using another operating system, please contact the IT Help Center at (818) 677-1400. For more information, please visit the section titled *Need Help?*

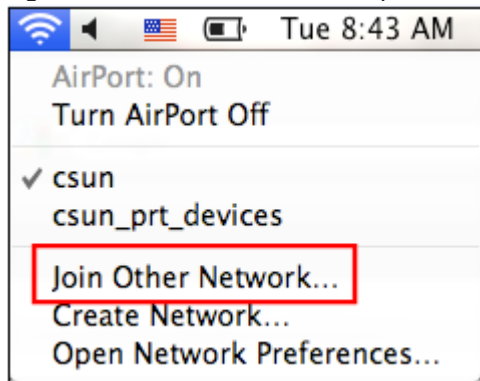

1. Select the **AirPort** icon  located in the upper right-hand corner of your screen.
2. If there is no **eduroam** option, select on **Join Other Network...**

Figure 1 - Join Other Network Option

3. The **Network Name** window displays. Enter or select the following:

- In the **Network Name** field, type **eduroam**. This is a case-sensitive field.
- From the **Security** drop-down menu, select **WPA2 Enterprise**.

Figure 2 - Enter the Name of the Network

4. Additional fields open (see Figure 3, below). Enter or select the following:

- In the **User Name** field (**enter your CSUN email address**) and **Password**.
- Select Automatic from the 802.1X drop-down menu.
- Make sure that the **Remember this network** checkbox is checked.

Figure 3 - Enter the Name of the Network - Additional Fields

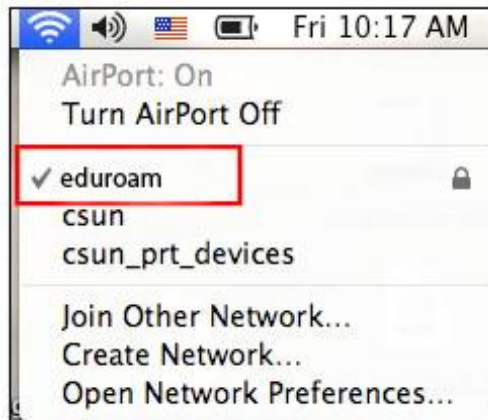

5. Select the **Join** button.

Note: if you typed in your user name and/or password incorrectly, you may be asked to enter the information again.

6. Select the **Continue** button on the Verify Certificate window.
7. If configuration is successful, you should now see **eduroam** as an option in your AirPort connection options (see Figure 5). It should also have the encrypted (lock) symbol next to it.
