

## HOW TO FIND THE MAC ADDRESS IN WINDOWS 10 - QUICK GUIDE

### INTRODUCTION

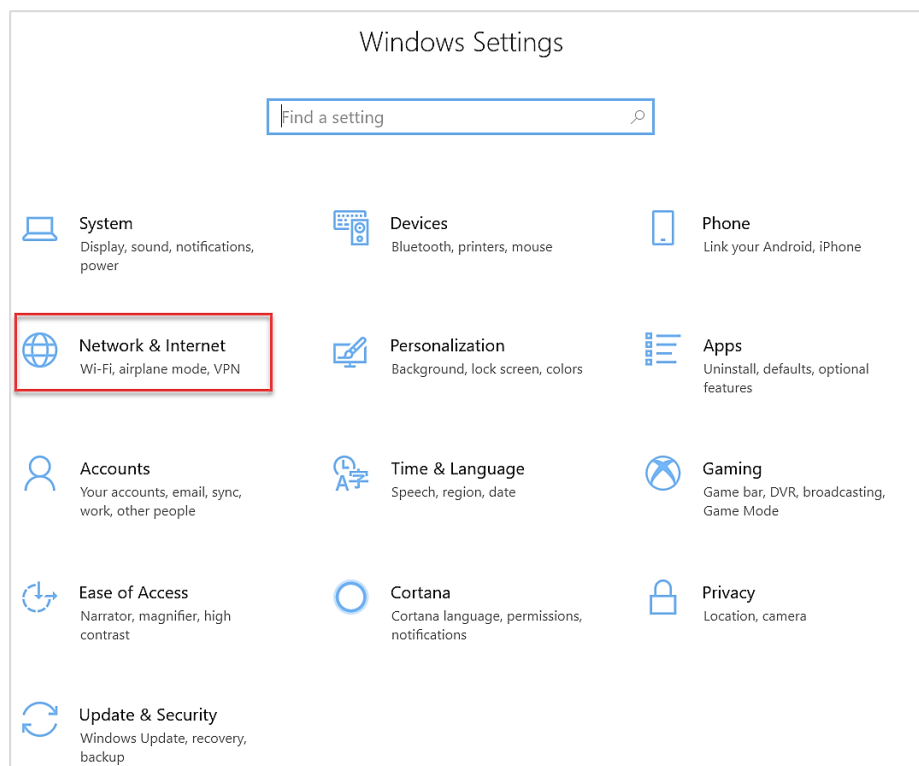

In order to request a [virtual phone](#) for your Windows machine, the MAC address is needed. This guide shows you how to find that information.

#### *How to Find the MAC Address on a Windows 10 Machine*

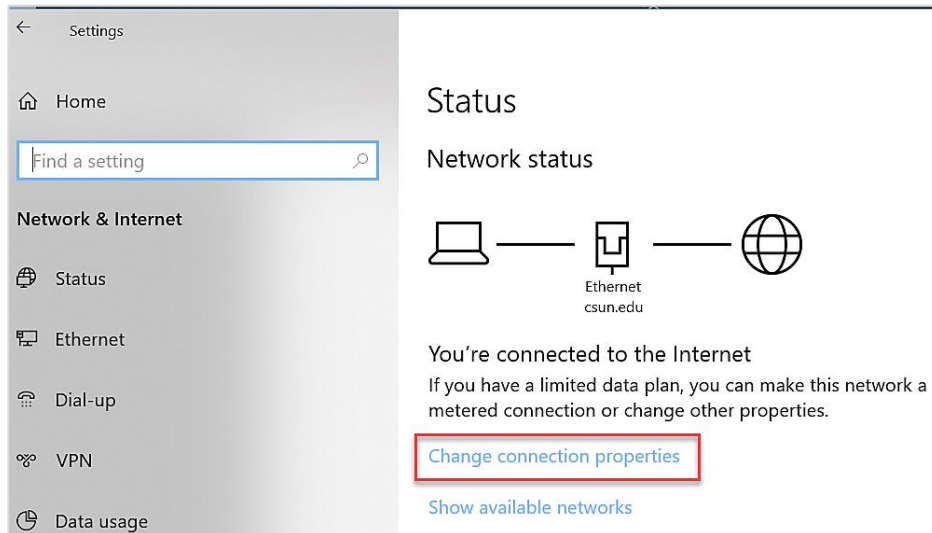

1. Right-click on the **Windows Start** button to bring up the menu, and then select **Settings**.

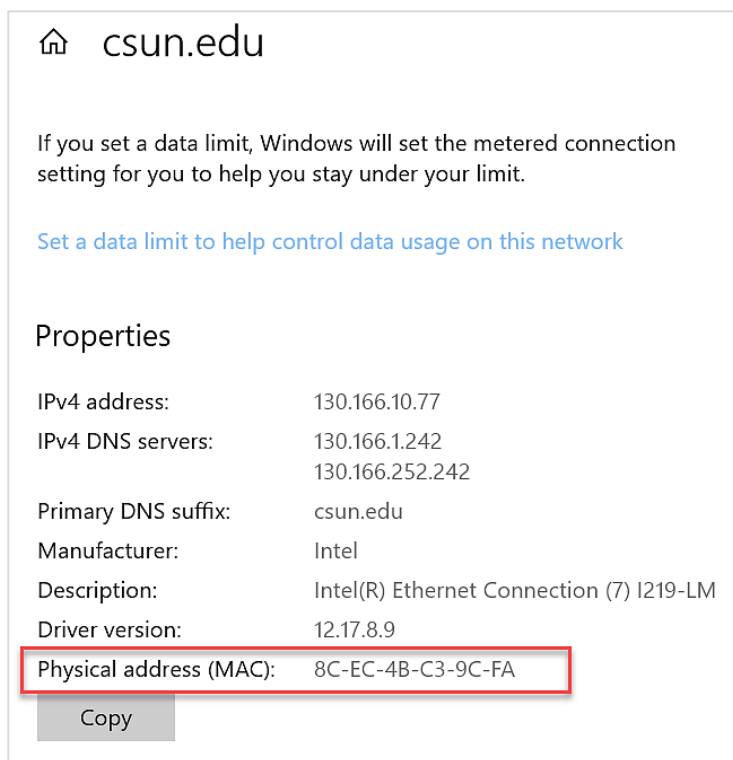

2. From **Settings**, select **Network & Internet**.

3. In the **Network Status** section, select **Change connection properties**.

4. In the **Properties** section, the **Physical address (MAC)** will be listed at very bottom. This number is needed to request a virtual phone.
