

TECHNOLOGY SERVICES FOR RESEARCH

The following technology services are available to CSUN faculty to help with research.

CSUN AMAZON WEB SERVICES (AWS) CLOUD PLATFORM

Research in a secure cloud service environment, offering compute power, database storage, content delivery and other functionality to help you move faster, scale and lower IT costs.

csun.edu/it/csun-amazon-web-services

CSUN ON PREMISE DATA CENTER

Support computationally intensive research computing in a managed campus data center which provides controlled physical access, availability of uninterrupted power supply (to sustain power for short intervals of power loss), monitored power distribution, air conditioning (humidity, filtering, cooling), fire suppression, and more!

HI-SPEED INTERNET CONNECTIVITY

Connect to an ethernet-based data communications network with high-speed 100 Gbps connection to CENIC's California Research and Education Network, an advanced network serving the vast majority of research and education institutions.

Easy-to-use, intuitive survey tool. Track participation and export to a spreadsheet or SPSS.

csun.edu/it/qualtrics

Collaborate and share files in an unlimited secure file storage space.

csun.edu/it/mycsunbox

MYCSUNSOFTWARE

Access software e.g., SPSS, SAS, R software and more!
