

## Pathways to Calculus

This diagram tells you what scores you need on various tests or what courses you need to take to get to your first Calculus class (Math 150A or Math 255A). Follow the diagram from the top, starting with your ELM scores. Take the tests or the classes along your pathway and you will reach your first Calculus course. Remember that all Math classes must be passed with a C or better to continue on to the next class.

The numbers in the diagram below are the scores you need to get on a test to continue on to the next course or test.
