

IPHONE 3 & 4 - ACCESSING CSUN'S ENCRYPTED WIRELESS NETWORK - QUICK GUIDE

INTRODUCTION

This guide provides setup instructions to connect to CSUN's encrypted wireless network (WPA2). Please note that this network is an additional resource and does not replace the current CSUN wireless network.

iPhone 3 & 4 WPA2 Setup

To begin the setup process, please verify that Wi-Fi has been enabled.

1. From the **Home** menu, select **Settings**.
2. In the **Settings** window, select **Wi-Fi** from the list of available options.
3. Select **Other**.
4. Under **Name**, enter **csun_wpa2** (lower-case).
5. Under **Security**, select **WPA2 Enterprise**.
6. Return to **Other Networks** and enter your username and password.
7. Select the **Join** button to complete the process.

Note: If setup is successful, the network displays under Wi-Fi settings and a checkmark indicates that you are connected.

iPhone 3 & 4 WPA2 Password Update

To begin the setup process, please verify that Wi-Fi has been enabled.

1. From the **Home** menu, select **Settings**.
2. In the **Settings** window, select **Wi-Fi** from the list of available options.
3. Select the arrow button for the Wi-Fi network selected (csun_wpa2).
4. Select **Forget Network**.
5. Select **Forget**.
6. Go back to view the network connections.
7. Select the Wi-Fi network, **csun_wpa2**.
8. Enter your CSUN user ID and password and accept the certificate.
9. Select the **Join** button to complete the process.

NEED HELP?

Contact the IT Help Center by phone (818-677-1400), online at (<http://techsupport.csun.edu>), or in person in (Oviatt Library, Room 33).
