Dual Iceberg Hypothesis by
Jim Cummins

1. Monolingualism

2. Semilingualism:
   First language is dropped to develop the second and proficiency in both suffers.

3. Partial Bilingualism:
   Fluency in both: no proficiency in L2.
4. 

Compound Bilingualism: Proficiency in L1 is the basis for proficiency in L2.

5. 

Coordinate bilingualism: Proficient and fluent in both languages.
