

Mission Statement

The mission of the School Research Collaborative is to support CSU Northridge faculty and their public school partners conduct research into teaching and learning and related scholarly initiatives. The focus of the activities of the Collaborative is on inquiry that is centered on problems of student learning with primary emphasis on improving educational personnel preparation programs throughout the university while also improving teaching practices in preK-12 schools. The research of the Collaborative is undertaken by a network of CSU faculty and school colleagues committed to educational change based on evidence of improved student learning in the LAUSD. Research questions will be developed collaboratively with our LAUSD school partners and will address important school based issues.

Teachers for a New Era/School Research Collaborative
