## Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

### NOTICE

#### WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

LOS ANGELES FAMILY AND NEIGHBORHOOD SURVEY: WAVE 1

CODEBOOK FOR ADULT MODULE

\*\*\*\*\*

STUDY DIRECTORS: ANNE R. PEBLEY, UCLA and RAND  
NARAYAN SASTRY, RAND

Filename: ADULT1

Number of records: 3557

Date: JUNE17\_04

File contains one record per Adult module respondent who started the ADULT module. A household may have up to two Adult module respondents. A household with no children will only have one Adult module respondent, the RSA. A household with children will have one Adult module respondent when the RSA is also the PCG or Primary Care Giver for the RSC (Randomly Selected Child). A household with children will have two Adult module respondents when the RSA is not the PCG. The PCG will have been given the Adult module as well in that case. The variable called SOURCE identifies who was treated as the RSA (SOURCE=1) and who was treated as a PCG-only (SOURCE=2). Note that the SOURCE=2 respondent skipped some sections in the Adult module because they were viewed as redundant since the RSA had answered them for the household.

There are a few cases where the second Adult module was given to someone who was not a PCG. This happened in households without children. In a household where there was an Emancipated Minor who was not selected as the RSA, the EM was also given the adult module. A couple times the respondent to the second Household module was inadvertently given the Adult module. The variable RSA\_TYPE identifies those Adult respondents who are not the RSA nor the PCG.

There are also a few cases where the only adult respondent was neither the selected RSA nor the selected PCG. Due to FI error, the head of the household was given the adult module instead. The households where this happened are: 1014338, 1014594, 1026388, 1043623, and 2020165. In another household (7044507), the PCG was given the adult module but her spouse was given the adult module instead of the RSA. In household 3144107, the RSA was done but an adult child of the PCG was given the second adult module in the household.

Sections J, K and L in the Adult module used information from the Event History Calendar (EHC) in determining which questions to ask. Flags were created in the transition between the EHC and the second half of the adult module that were used in Sections J, K and L.

Due to occasional interviewer error which resulted in the corruption of those flags, there are instances where respondents were asked the wrong questions or were incorrectly skipped out of questions they should have been asked. We have tried to correct the flags to reflect the EHC data, which is correct, to identify those instances where variables were inadvertently skipped, and to fill in correct information from the EHC where needed. A value of -5 indicates that data should have been collected but was not. This is to distinguish true skips, which have blanks, from inadvertent skips. However, there may be cases that we have missed, so users should consider this problem if they find inconsistencies between the EHC data and the Section J, K and L data.

In Section E there are numerous checks on dates to see if they fall in the window of the last 2 years before interview. Events occurring in the last two years have details about them collected. Missing dates are not necessarily handled the same way for all such date checks. In all but date checks AE3, AE38, AE47, AE51, AE56, and AE60, a missing year is treated as a date more than two years ago and questions about the event are skipped. In those 6 checks, a missing year is treated as a date within the last two years.

Note that in the fertility history in Section E, there are a few cases where a child was born after the household roster was done but before the adult module was done. These infants will not appear in the household roster but will appear in the Section E fertility section.

There are 11 households that had moved from their original screening address by the time the adult module was done. The distance variables are based on the distance from the screening address since we did not learn till after geocoding that these 11 cases existed. Thus the distances may be suspect for these cases. They are identified by the variable DIFFHOME which equals 1 for them.

CITY NAMES FOR LOCATIONS MENTIONED IN THIS MODULE ARE NOT AVAILABLE IN THE PUBLIC USE DATA. STATE AND COUNTRY NAMES HAVE BEEN RECODED INTO REGIONS. STATES IN THE UNITED STATES OTHER THAN CALIFORNIA ARE ASSIGNED TO US CENSUS DIVISION CODES. STATES IN MEXICO AND CENTRAL C AMERICAN OUNTRIES ARE RECODED TO MEXICO AND CENTRAL AMERICA. ALL OTHER STATES AND COUNTRIES ARE RECODED INTO REGIONS DEFINED BY THE WORLD BANK.

Number of records: 3557

Date: JUNE17\_04

\*\*\*\*\*

Variable Name	Type/Length	Variable Label Variable value	Freq
---------------	-------------	----------------------------------	------

\*\*\*\*\*

SAMPLEID	Char 7	CASE IDENTIFIER	
		_Text_ Has text response	3557
SAMPID_N	Num 7	NUMERIC SAMPLEID	
		Has a value	3557
HHID	Num 5	HOUSEHOLD IDENTIFIER	
		Has a value	3557
PID	Num 2	ROSTER ID NUMBER OF PERSON	
		Has a value	3557
DIFFHOME	Num 2	HHLD MOVED AFTER SELECTION	
		0 No	3538
		1 Yes	19
SOURCE	Num 2	SOURCE MODULE FOR ADULT RESP	
		1 Given First Adult Module	2623
		2 Given Second Adult Module	934

NOTE: For modules given to more than one respondent, SOURCE identifies the person given the first module in CAPI versus the second. For the Adult module, the first module was to be given to the RSA; for the Parent and Child modules, the first module was to be given to the Child module the first module was to be RSC. This however did not always happen. Skips in the second module were different from the first (e.g., if an RSC was given the module intended for the SIB, the RSC would not have been asked questions he/she should have been.) Thus in the Adult module, if SOURCE=1 and RSA\_TYPE>2 then the module intended for the RSA was given to someone else; in the Parent or Child modules, if SOURCE=1 and KIDTYPE is not RSC, then the module intended for the RSC was given to someone else.

\*\*\*\*\*

Variable Name	Type/Length	Variable Label Variable value	Freq
---------------	-------------	----------------------------------	------

\*\*\*\*\*

RSA_TYPE	Num 2	TYPE OF ADULT RESPONDENT	
	1	RSA ONLY	1565
	2	RSA and PCG	1054
	3	PCG ONLY	925
	4	EM	3
	5	NOT RSA OR PCG	10

NOTE: The value of 5 exists when the adult module was given to someone other than the RSA or the PCG. Those designated as Emancipated Minors (EM) were given the adult module and are coded with a value of 4. In a few instances, the person given the second household economy module, if not the RSA or PCG, was given the adult module. In a couple other instances, the wrong person was given the adult module.

INTRVWER	Num 3	INTERVIEWER ID NUMBER

MARITAL	Num 2	ROSTER MARITAL STATUS	
	-5	Missing	1
	1	MARRIED	1999
	2	LIVING WITH A PARTNER, NOT MARRIED	374
	3	NEITHER	1153
	4	BOTH MARRIED AND LIVING WITH A PARTNER	30

NOTE: This is a CASES variable created from RA10 and RA7\_A. RA10 was not asked for those who were the spouse or partner of the head. MARITAL was created in CASES to be used when the program needed to check if the person was married or cohabitating. MARITAL, like RA10, does not represent the actual marital status of the individual. People who are not legally married but who were said to be the spouse of the head (RA7\_A=1) will have MARITAL=1 because CASES set it that way. True marital status was only collected for those given the Adult module. Question AE1 asked for current marital status. There were records where MARITAL was not filled in for some adults. We tried to fill it with the proper value when we had information to do so.

Because MARITAL was automatically set to 1 for RA7\_A=1 and 2 for RA7\_A=2, one can see some disagreement with the MARITAL value for the RA7\_A=0 person (the household head). The household head may be said to have an RA10=3 or have an RA10 that is not the same as the MARITAL value for the RA7\_A=1 or 2 person.

SPOUS_ID	Num 2	ID OF SPOUSE IF IN HOUSEHOLD	
	.	Legitimate Skip	1216
		Has a value	2341

NOTE: This variable was created ex post using the information in the relationship to head field and the R5 fields. CASES did not create an identifier for the spouse of each married or cohabitating household member. We created SPOUS\_ID to help users more easily identify the spouse/partner of a given household member.

RRSCI	Num 2	ROSTER ID NUMBER OF RSC	
		.	Legitimate Skip 700
		Has a value	2857

RSIBI	Num 2	ROSTER ID NUMBER OF SIB	
		.	Legitimate Skip 1861
		Has a value	1696

NOTE: There are 13 households where an RSC was selected who had eligible siblings but no SIB respondent was selected. Those 13 households are: 1033508, 1038444, 1044255, 1046318, 3040691, 3044695, 3143561, 3147879, 5126539, 6018357, 6035849, 6050592, and 7016846. It is not clear why the CAPI code did not select a SIB. It could be that the FI later edited the roster after the SIB respondent selection was done. There are four other households where the SIB is not the biological sibling of the RSC. Those households are: 3023078, 3129078, 4118861, and 6045591. Again this may be due to subsequent editing of the roster by the FI after SIB selection.

AD1WRONG	Num 2	AD1 ORIG WRONG BECAUSE AC34_4 ORIG INCOR	
		0 No	3489
		1 Yes	68

NOTE: There were 68 instances where AC34\_4 was originally coded as 1 but AC34\_CYR was not the USA. In these cases, the original value of AD1 was wrong so the skip at AD1 was wrong. These 68 who were not born in the US were not asked AD2-AD10. We have corrected AD1 to be consistent with the corrected AC34\_4 and have assigned -5 values to AD2-AD10. However, we have left AD11-AD17 as the respondent answered them since we do not know if the person ever attended school in the USA because AD2 was not asked.

SKIP:

if AE67 =3 then go to AE69

NOTE: Questions AE67 and AE68 were to be asked of all current marriages and cohabitations. However, due to an error in the skip pattern in the questionnaire at AE63, only those current marriages and cohabitations where the spouse/partner was not in the household were asked AE67/AE68. This problem was not detected and corrected until late March 2001. Those cases where AE67/AE68 were inadvertently skipped have codes of -5 in the AE67 and AE68 variables.

	65-69 years old	1

NOTE: The AE82xAGE variables are created by CAPI from the birth dates collected in question AE82. If only the day was missing, the age was computed assuming that the birthday had already passed by the interview date. If the month was missing but year was not, the age was computed assuming the birthday had already passed. Only if year was missing was an age not computed.

if AE83 =1 : IF AE80&gt;1 GO TO AE81B

AE80=1 GO TO AE90

if AE83 =3 then go to AE89\_1

NOTE: The AE83x variables have been revised if a child was original said to not be in the household but the child was in the household roster. However, children said to be in the household but who were not listed in the roster, still have AE83x=1. These will have an value of 99 in the AE83x\_id roster member number variable.

AE83_ID	Num 2	ROSTER ID OF OWN CHILD 1	
		. Legitimate Skip	1478
		Has a value	2079

NOTE: The AE83x\_ID variables were created ex post after comparisons of those with AE83x=1 and the household roster, using names and ages and parental information in the roster. In some cases a child listed as being in the household in AE83x was not listed in the household roster. Those children have AE83x\_ID values of 99. In other cases a child listed in the roster as a biological child of the Adult respondent was listed as not being in the household in AE83x. In those cases, we revised AE83x for the child.

		.	Legitimate Skip 75
		1	SPOUSE OR PARTNER IS PCG 965
		2	SPOUSE/PARTNER IS RSA 561
		3	SPOUSE/PARTNER NOT RSA/PCG BUT IN HH 1184
		4	SPOUSE/PARTNER IS NOT IN HH 56
		5	HAS NO SPOUSE/PARTNER 716

## SKIP:

```

if AF1 =1 then go to AGBTIM
if AF1 =2 then go to AGBTIM
if AF1 =3 then go to AF2A_1
if AF1 =5 then go to AGBTIM

```

NOTE: AF1 is a CAPI-generated variable. There were some coding problems that resulted in some respondents being put into the wrong AF1 category. This resulted in cases where those with noninterviewed spouses did not have Section F administered. AF1 has been corrected ex-post in the re-release of Wave 1 to reflect the correct spouse information regarding presence in the household and RSA/PCG status. Section F data for those who should have been asked and were not has been set to the -5 missing code.

1	Yes	35

NOTE: The skip at the start of Section F was incorrectly specified on the questionnaire when the CAPI program was designed. The skip at AF1=3 was supposed to be to AF2a not AF3a. We had wanted to get the detailed ethnicity info for resident spouses who were not respondents but this was inadvertently skipped for such cases. The only ethnicity info for those AF1=3 spouses done before the correction is found in the roster. Such cases will have a code of -5 in the AF2A variables. GROUPS 11 AND 12 WERE COMBINED AND GROUPS 13 AND 14 WERE COMBINED IN THE PUBLIC USE DATA RESULTING IN 13 CATEGORIES INSTEAD OF THE 15 IN THE QUESTIONNAIRE
